NISHAR AHMED

Data Engineer

harshahmed@example.com — +91-XXXXXXXXXX — India

Professional Summary

Data Engineer with 2 years of experience in data integration, ETL pipelines, data transformation, database development, and cloud-based data processing. Hands-on experience with Python, SQL, Apache Spark, PySpark, AWS, Azure, Airflow, PostgreSQL, MySQL, and data warehousing. Experienced in building reliable data pipelines, transforming large datasets, automating workflows, optimizing queries, and preparing data for analytics and business intelligence.

Technical Skills

Programming: Python, SQL, Bash

Data Engineering: ETL, ELT, Data Pipelines, Data Integration, Data Transformation, Data Cleaning, Data Warehousing

Big Data: Apache Spark, PySpark, Hadoop

Workflow Orchestration: Apache Airflow, DAGs, Workflow Automation

Cloud: AWS (S3, EC2, Glue, Lambda, RDS, Redshift), Microsoft Azure (Data Factory, Blob Storage)

Databases: PostgreSQL, MySQL, SQL Server, Amazon Redshift

Data Modeling: Star Schema, Snowflake Schema, Fact Tables, Dimension Tables, Data Warehouses

DevOps & Tools: Git, GitHub, Docker, Linux, VS Code, Postman

Concepts: Data Pipelines, Batch Processing, Data Quality, Query Optimization, Partitioning, Scheduling, Monitoring, Scalability

Professional Experience

Data Engineer **2 Years**

Company Name, India

- Developed and maintained scalable ETL pipelines using Python, SQL, PySpark, and Apache Airflow for automated data processing.
- Worked with AWS services including S3, Glue, RDS, Lambda, EC2, and Redshift for cloud-based data processing and storage.
- Developed SQL queries involving joins, CTEs, subqueries, aggregations, window functions, and stored procedures.
- Designed data warehouse structures using fact and dimension tables and implemented star and snowflake schemas.
- Implemented data validation, error handling, logging, and monitoring to improve pipeline reliability and data quality.
- Collaborated with analysts, developers, and business teams to understand data requirements and deliver reliable datasets for reporting and analytics.

Projects

Automated ETL Data Pipeline

- Developed an automated ETL pipeline using Python, SQL, and Apache Airflow to extract data from multiple sources, transform datasets, and load them into PostgreSQL.
- Implemented scheduled workflows, validation checks, logging, and failure handling for reliable data processing.

AWS Cloud Data Warehouse

- Built a cloud-based data pipeline using AWS S3, Glue, and Redshift to process and store structured analytical data.
- Implemented data transformations, partitioning, and optimized warehouse queries for analytical workloads.

Big Data Processing with PySpark

- Developed PySpark jobs to clean, transform, and aggregate large datasets for downstream analytics.
- Applied partitioning and optimized Spark transformations to improve processing efficiency.

Education

Bachelor of Technology in Computer Science and Engineering

University Name, India CGPA: 8.2/10

Higher Secondary Education

School Name, India Percentage: 92.5%

Certifications

AWS Certified Cloud Practitioner — Microsoft Azure Data Fundamentals (DP-900)

Additional Information

Location: India — **Career Interest:** Data Engineering, ETL, PySpark, Apache Airflow, AWS, Azure, Data Warehousing, Big Data, SQL
